DESCRIPTION

The presented project is a module in the form of a stainless-steel planter with galvanized container for greenery (eg. trees, shrubs). The walls of the planter fit every element of The City Lounge. Large planter is equipped with drainage system and a system which maintains moisture for vegetation. This model also has a system that prevents tree roots from freezing in the winter and from drying up in the summer. The overall weight of the planter is about 1.5 tons, which provides stability for other devices. In order to facilitate the installation, the planter has concealed spaces in the size of a Euro-pallet, which allows insertion of a forklift or a pallet jack and gives possibility to move our product. Transportation of all elements is done using crane/HDS. The inner part of the planter is equipped with a special anchors, which stabilize roots of trees and which can also be used for lifting the entire construction. After setting the planters in the final location the outer shell made of stainless steel is lowered, which fully protects the product against uncontrolled moving.

GENERAL TECHNICAL DATA**Materials**

- Stainless steel
- Galvanised steel insert

Dimensions

- width: 112.5 cm
- height: 112.5 cm
- depth: 112.5 cm
